

## FLEXI-FIBRE AFTERCARE ADVICE

### WASHING INSTRUCTIONS

#### **If worn daily wash every 7-10 days**

1. Prior to washing, remove all knots and tangles.
2. Fill a bowl or sink with tepid water and a little Trendco Revitalise Wash. Immerse the wig or hairpiece in the water. Rinse. Repeat if desired.
3. Using your hands, smooth through some Trendco Detangling Cream. Leave this to soak for a few minutes then rinse thoroughly .
4. Wrap in towel to remove excess water.
5. Very gently brush your hairpiece or wig. Place on a polyhead or wig stand.
6. At this stage, while it is damp, lightly spray on Trendco Moisture Protection. Leave to dry naturally overnight.
7. In the morning (once dry), shake, brush or use heated appliances on your hairpiece or wig to achieve your desired style.
8. For extra hold, apply some Trendco Sculpt and Create.

#### Heated Appliances

Flexi-Fibre can be blowdried, straightened or curled. However, heat stylers must NOT exceed 140 degrees. Always use heated tools with a temperature gauge. If you straighten Flexi-Fibre it may result in permanent straightness. Using higher temperatures will result in permanent damage to the Flexi-Fibre.

### FLEXI-FIBRE ADVICE AND FA- Q'S

Use our fantastic Trendco Flexi-Fibre products for a prolonged lifespan.

Avoid opening oven doors and standing under overhead heaters. This could singe the fibre. Never wash in hot water.

When brushing Trendco Flexi-Fibre we recommend using a soft brush.

Please note that eventually the fibre will wear out and frizz—the name for this is 'friction frizz'. Our Trendco Moisture Protection helps reduce Friction Frizz and helps ease tangles. Please apply this sparingly a couple of times in between washes.

Flexi-Fibre needs to be replaced more frequently than human hair. The expected lifespan for a short fibre wig is 4 -6 months, a mid-length wig (or bob) is between 3-4 months and a long with is 2-3 months. Hairpieces are expected to last 4-6 months. These time frames are only approximate and are based on everyday wear.

Flexi-Fibre cannot be tinted or bleached.

Scrunched/permed models must never be brushed: detangle using your fingers or a wide-tooth comb.

Flexi-Fibre wigs and pieces are hand-tied which allows you to change the parting and hair direction.

We do not recommend sleeping in your wig/hairpiece—it will cut the lifespan by at least half.

If you have hair underneath a wig and need more stability, we advise you to use Snap Lok Clips, Kirby Grips or wear a wig cap for extra security. The Silicon on the PP wigs creates extra grip too.

Most wigs/ hairpieces can be secured with Mono Tape if you have complete hair loss.
