

## **Eyelash and Eyebrow Tinting Aftercare Advice**

---

- Try not to rub your newly tinted eyebrows/lashes.
- Should you experience irritation or redness, apply a cool damp cotton wool pad to the affected area.
- If you are out in direct sunlight, wear sunglasses to prevent your tint from fading (just as you would protect coloured hair from the sun).
- To maintain your colour, eyebrow tinting should be done every 3-4 weeks and eyelash tinting every 4-6 weeks.
