

Eyelash Extensions Aftercare Advice

- Do not touch your eyes for 1 ½ hours after application, while adhesive dries thoroughly.

Do not rub or pull on the lashes, be gentle with them.

- Do not use an oil based make up remover or cleanser as these can break down the adhesion and loosen your lash extensions. Use an oil free formula.

Synthetic lashes can become frizzy if exposed to extreme heat so avoid extremes of temperature, such as a hot sauna.

- Do not use eyelash curlers or perm your lashes.
- Never attempt to pull out your own lash extensions, this could damage your natural lashes. Have them removed professionally.
